

Number of modules x 1000 + 1027
e.g. 5 modules = 6027

29cm quadro truss covered with black or white lycra sleeves

Textured stainless steel plates

All vertical walls: Stainless steel covered with black or white sticky foil

Black or blue mats reducing splashes

Lighting

2 or more 230VAC black cables 8m long
Standard european CEE7/7 plug

Pump always installed on the left side of the installation

Construction height: 2002 - 6002, rounded to 500
e.g. 4002

There are two ways to fix a banner

1. Slide-in (only horizontal banners)
2. Using screws (both horizontal and vertical)

Banners and stickers should be delivered by the client
 Banners can be placed on the front side or front and back side

Requirements:

Slide-in banner:

- Thickness: 3-5mm
- Height: 290mm +/-2mm
- Length: total length of the construction
- No holes necessary

Screw-fixed banner:

- Any reasonable height and shape
- Weight: 1,5kg per banner holder
- Holes diameter: 6-7mm, holes should be already drilled before the installation. Our technicians will not be equipped to drill holes at the place

Clamps used only for slide-in banners

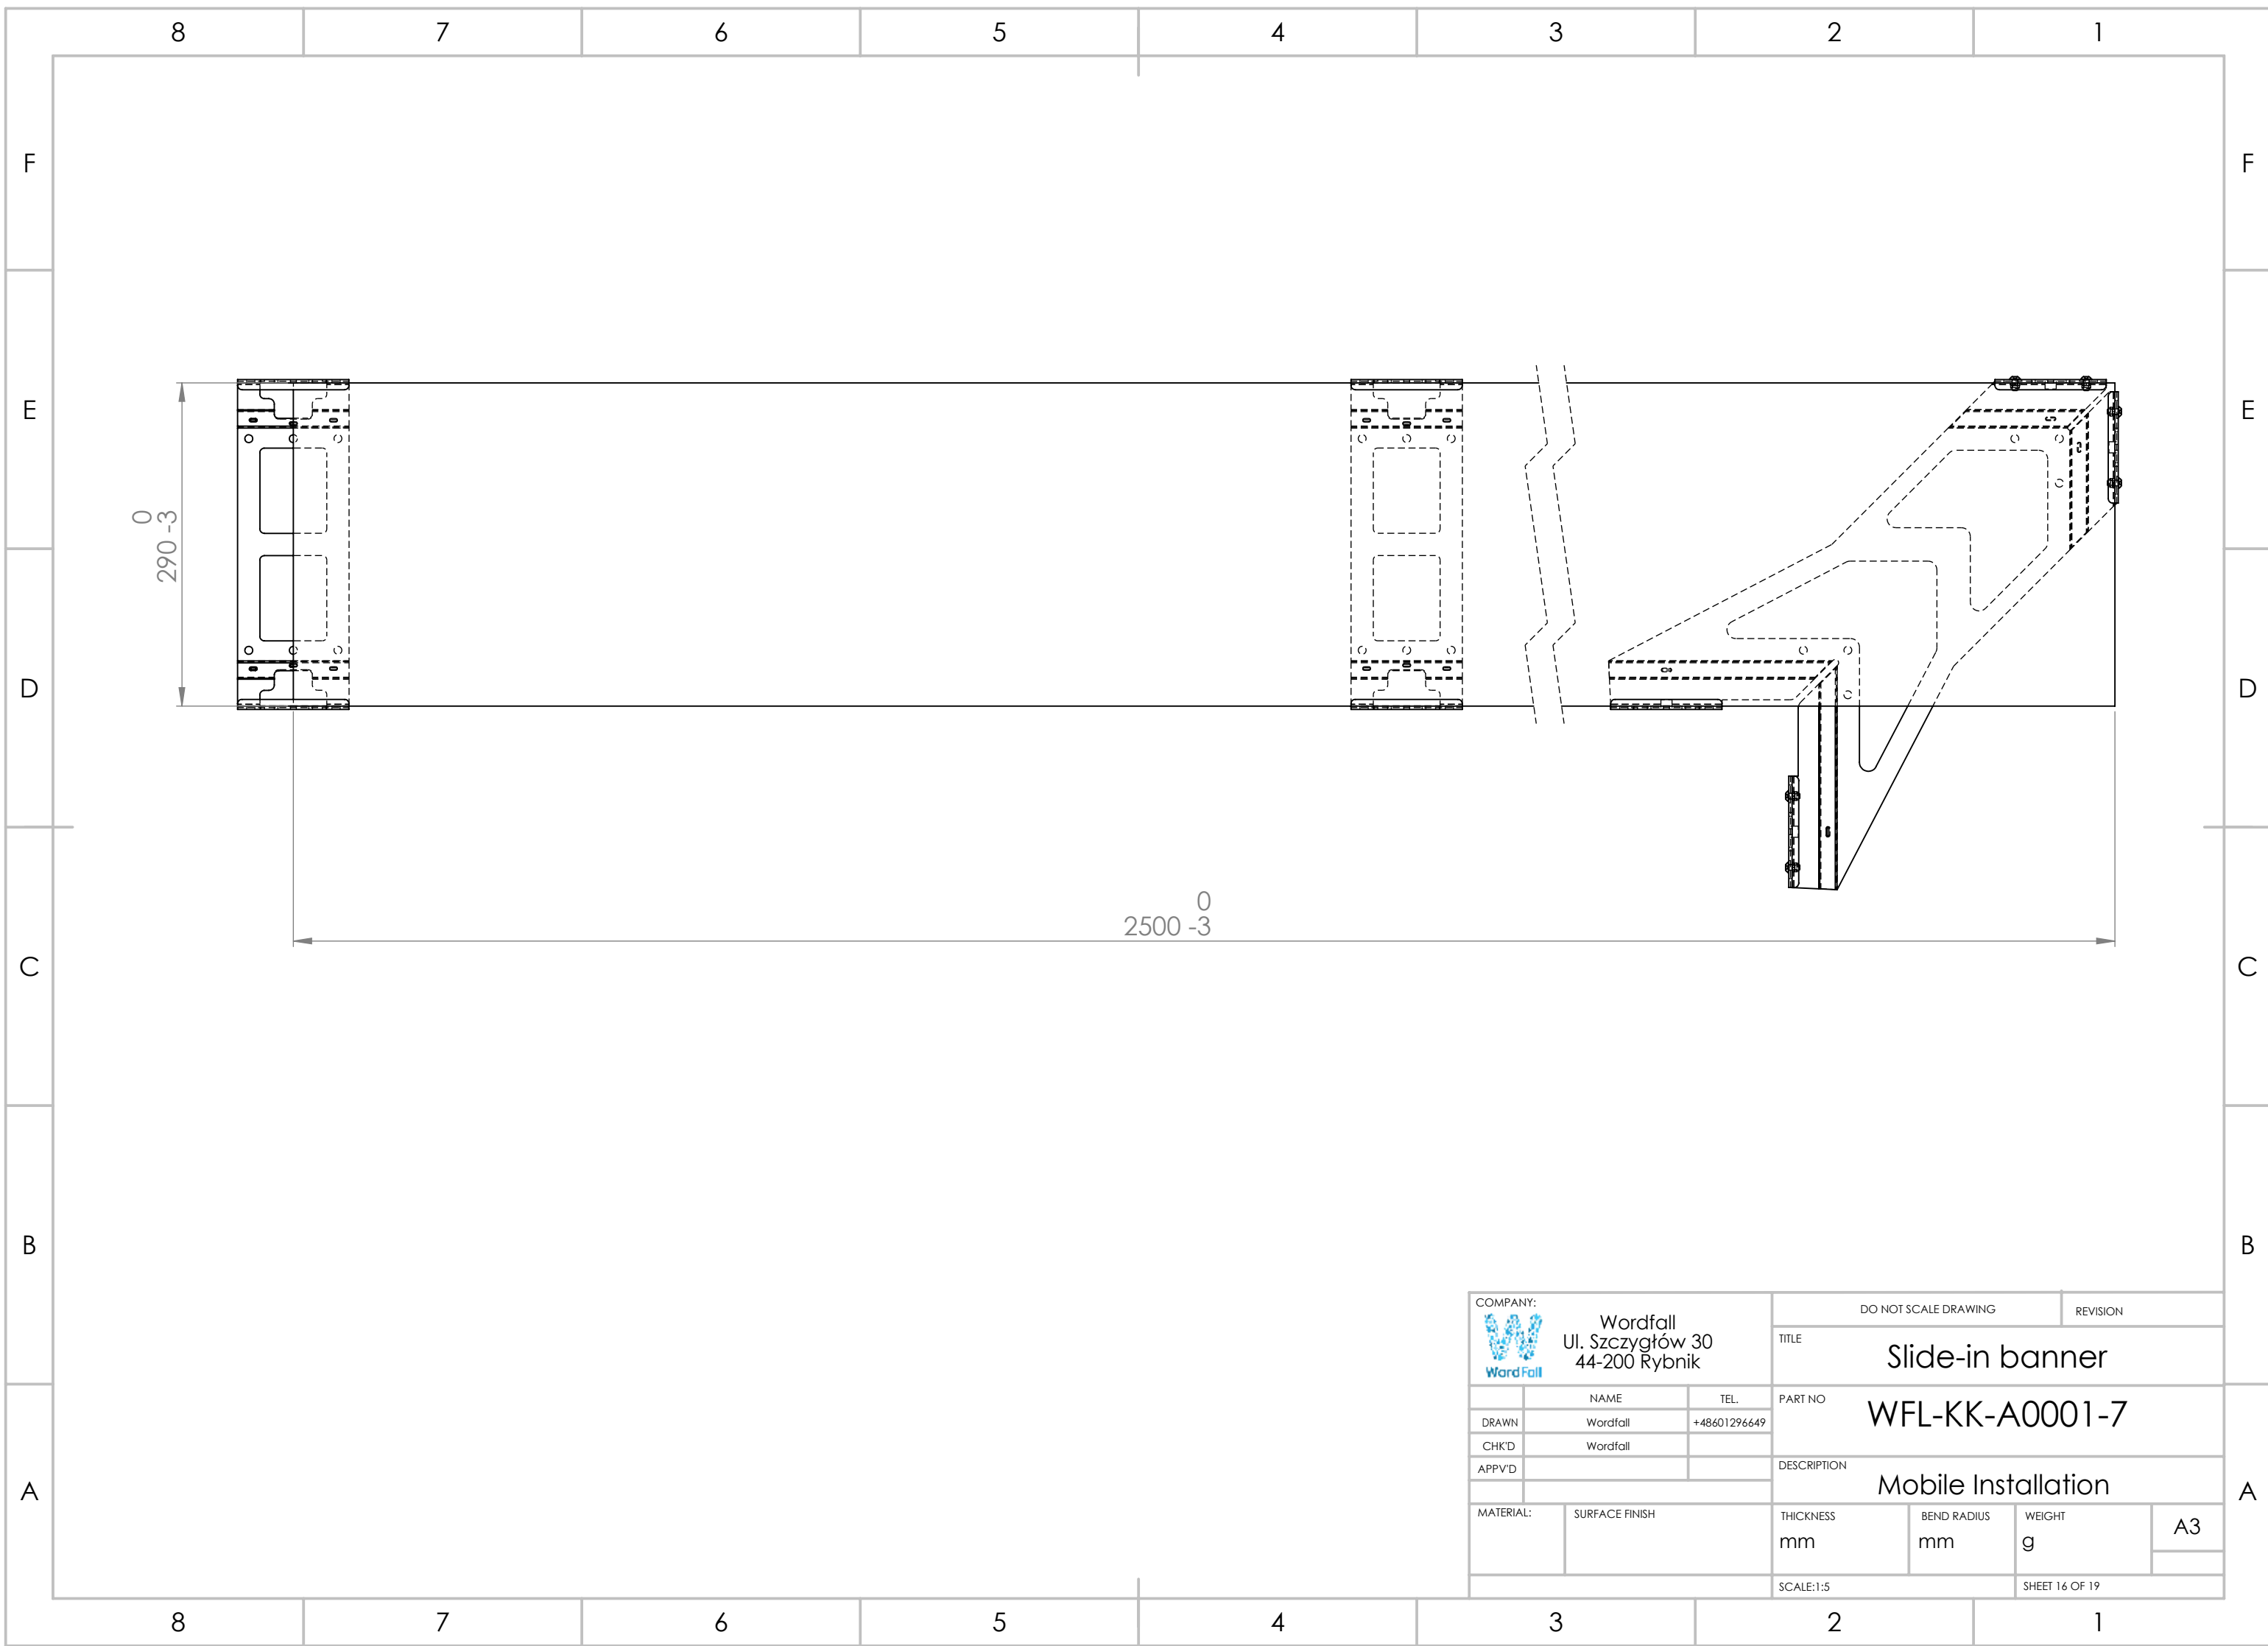

M5 screws used only for screw-fixed banner
